

# INDUSTRIAL ROPE RESCUE

## COURSE OUTLINE

This course is designed for rapid response rescue of persons suspended on a lanyard or height safety equipment. The course is ideal for emergency response crews that need to deal with difficult rescue situations

The course covers

- Rescue planning
- Risk assessments
- Mid pitch rescue techniques
- Lowering and belays
- Raising and haulage systems
- Treatment of suspension trauma
- Stretcher escorting and evacuation
- Cableway evacuation

Safety issues related to working at heights are covered, from how forces are generated in falls to correct selection and use of anchor points and height safety equipment.
