

SAFE WORK AT HEIGHT

SAFE WORK ON ROOFS

COURSE OUTLINE

Participants are introduced to important legislation, codes of practice and Australian Standards relating to working at height. An understanding of hazard identification, job safety analyses and the height safety hierarchy of control will be achieved. Safety issues related to working at heights are covered, from how forces are generated in falls to correct selection and use of anchor points and height safety equipment. Other areas introduced include the use of ladders, scaffolding and EWP's.
